

An Estimable Model of Fertility, Labor Supply, and Human Capital Formation

Flávio Cunha

University of Pennsylvania and NBER

Abstract

I develop an estimable model of fertility, labor supply, and human capital formation of children. The model is estimated using the CNLSY/79, NLSY/79, and PSID data sets. I use the model to evaluate the impact of taxation and welfare on labor supply, fertility, and human capital of children.
